

# ASTECC<sup>®</sup> also has Re-Ply<sup>™</sup> Systems for metal, asphalt, and concrete roofing substrates.

Get a free inspection survey of your roof. You, too, could be saving thousands of dollars.

This asphalt roof with multiple supports and penetrations was a costly nightmare for traditional roof replacement, but was efficiently reroofed with a seamless, fluid-applied ASTEC<sup>®</sup> Re-Ply<sup>™</sup> System.

This multi-building metal roof complex is being selectively restored as needs arise. ASTEC<sup>®</sup> Re-Ply<sup>™</sup> Systems permit reroofing of complete facilities or only problem areas, as budgets allow, until total sustainability is achieved.

This concrete roof with a helicopter pad in Dubai was cracking in the hot, salt mist climate. ASTEC<sup>®</sup> Re-Ply<sup>™</sup> fluid-applied roofing bonded directly to the restored concrete, producing a single, stable and sustainable new surface.

## Why pay to replace a roof you can Re-Ply?

**FREE ROOF SURVEY**

1.800.223.8494  
icc-astec.com/survey

Seamless, sustainable roofing begins with an inspection of your current roof substrate. If your roof qualifies for an ASTEC Re-Ply System; repairs, wet insulation, corrosion, splitting seams, will all be noted in your detailed proposal.

**Re-Ply<sup>™</sup> Roofing Systems**  
Perfecting Fluid-Applied Membranes Since 1986

### Proven roof systems; professionally applied.

Great roofing products are only as good as their application. ASTEC<sup>®</sup> Re-Ply<sup>™</sup> Roofing Systems are only installed by contractors Trained and Authorized by ASTEC to apply the proper Re-Ply<sup>™</sup> Roofing System to earn a 10- or 15-Year ASTEC<sup>®</sup> Renewable<sup>™</sup> Warranty...for Materials AND Labor!

# Single Ply Roof Problems?

Seam Separation?  
Leaking Penetrations?  
Lifting Fasteners?  
Tears in Membrane?

The ASTEC<sup>®</sup> Re-Ply<sup>™</sup> Roofing System  
for **Single Ply Roofs**

# The ASTEC® Re-Ply™ Roofing System for **Single Ply** Roofs

With hundreds of millions of square feet applied since 1986, ISO 9001 Registration, multiple accreditations, and the highest quality materials... **ASTEC is the right choice.**

*This failing single ply substrate is converted to a seamless, sustainable cool roof*

*Repair substrate integrity as necessary*

*Clean surface and neutralize chalking*

*Seal all seams, splits and penetrations*

*Apply multiple layers to system specs*

*Maximize cooling efficiencies with ASTEC*

*10- or 15-Year RENEWABLE™ Warranties for Material AND Labor*

ASTEC® RENEWABLE™ Warranties ensure a sustainable, weatherproof cool roof. At each Warranty term, ASTEC® Re-Ply™ roofs can be restored to spec and the warranty renewed at a marginal expense.

# ASTEC success and satisfaction — proven since 1986...

Convert failing, leaking single ply roof maintenance headaches into sustainable cool roofing — **without costly re-roof!**

*Ideal solution for harsh climes*

← This EPDM roof took a beating in its coastal clime. ASTEC converted it to a sustainable cool roof for less than half the cost of replacement — in less than one third of the time — with no tear-off or disposal problems, and no disruption of museum activities or exhibits.

→ A large New England food store chain prudently tested the ASTEC® Re-Ply™ System for EPDM roofing on one of their problem roofs. The result was a far better roof — for less cost — leading to contracts upgrading the next five facilities to ASTEC® RENEWABLE™ Warranty roofing.

*Ideal solution for sustainability*

*Ideal solution for code compliance*

← Collateral costs for roof replacement at urban sites can be extreme. Here an EPDM roof, ripped by Hurricane Sandy, serves as a restored substrate for a seamless ASTEC® Re-Ply™ roof — fluid-applied and tinted to satisfy code.

→ Any roof top with multiple vents, skylights, piping, HVAC equipment, or walkways is very expensive for conventional roofing. A fluid-applied ASTEC® Re-Ply™ roof is the ideal solution. Curbs, boots, drains, gutters and parapets are monolithically sealed to a seamless roof.

*Ideal solution for complex roofs*

*Ideal solution for urban high rises*

← ASTEC® Re-Ply™ fluid-applied roofing requires no cranes for replacement construction. The new roof will have a much cooler footprint — especially in high "heat island" sites — and often qualifies for "Green" building and other energy saving incentives.

→ Here, the Roof Consultant specified an ASTEC® Re-Ply™ roof at a \$400,000 savings over roof replacement. Changing a single ply substrate to ASTEC can be viewed as a maintenance expense, or as a capital expenditure.

*Cool roof benefits — Free bonus!*

Turn your old single ply roof into a weathertight cool roof !

Hundreds of millions of square feet applied — Many millions of dollars saved
