DUANE YOURKO  
ARIZONA ROOFING  
CONTRACTORS ASSOCIATION

Governor Doug Ducey  
1700 W. Washington Street  
Phoenix, AZ 85007

Dear Governor Ducey:

As the U.S. confronts the current public health crisis related to the coronavirus pandemic, the Arizona Roofing Contractors Association wants to express our strong concerns with respect to state and local regulations governing “essential businesses” and “essential workers” during this critical time.

We are aware that states and municipalities across the nation are responding to the current crisis by issuing, and frequently revising, emergency orders and/or guidance that may conflict with the goals of containing coronavirus and protecting the health and welfare of our communities. Recent emergency orders and guidance threaten the ability of roofing contractors, manufacturers, distributors and other industry employers to operate and aid in the response to the coronavirus pandemic. Clarity and consistency are needed given the multiple orders from hundreds of state and local governments, each with different rules. Thus, we recommend your administration issue guidance that clarifies essential businesses, services and workers, and that this guidance recognize the role of the roofing industry in protecting Arizona families and employers.

The U.S. roofing industry, including manufacturers and their raw material suppliers, distributors, and roofing contractors, is an essential \$100 billion plus sector, with an estimated 1.1 million employees, that provides critical materials and services to ensure home and business safety. We are integral to the infrastructure that will enable our nation to see through our current times and help our communities rebound quickly. The products we make and install protect hospitals, grocery stores, pharmacies, and other businesses actively providing critical care and resources to thousands of Americans in need of assistance during this time of crisis, as well as families who are being asked to shelter in place or otherwise take every measure to remain indoors. For example, as the role of hospitals become ever more critical in providing care that our fellow citizens need at this time, it will be critical that roofing companies are able to quickly fix roof leaks or provide other essential services to keep these buildings operating safely.

Also, as we head into the spring and summer months, it is vital the roofing industry be prepared and well-resourced to quickly respond to the impacts that extreme weather and natural disasters may inflict on homes and buildings. We are employing prudent measures to prevent the spread of infection at facilities, sites and projects, and most roofing work is performed outdoors where open air helps mitigate any risk to employees. We encourage federal, state, and local officials to partner with the roofing industry to address the challenges ahead in a comprehensive, coordinated manner.

The roof is the first line of defense against the elements and extreme weather, and there is nothing more important than a sound roof in protecting Arizona families and businesses as they take action to address this crisis and sustain our economy.

Respectfully,

Russ Hyman  
ARCA President

Duane Yourko  
Executive Director
