ROOFER HOT BOXES

Powerblanket Hot Boxes efficiently heat temperature sensitive materials such as paints, roofing materials, chemicals, epoxies, resins, equipment, and pallets of any material. Easily assembled, taken apart, and moved from job to job, hot boxes are ideal for cold weather storage, freeze protection, transporting, job site heating, remote location use, and winter roofing.

WANT GREATER PEACE OF MIND?
Try Powerblanket with Beacon Controllers

WHY CHOOSE OUR PALLET HEATER HOT BOXES?
• Preserve temperature sensitive materials
• Quickly and effortlessly install the compact portable design
• Localize heat and save money by not heating a warehouse or building
• Lower energy-related costs with the highly efficient design

AVAILABLE IN 3 PERFORMANCE LEVELS

POWERBLANKET LITE HOTBOX
• 2 sizes available: Fits 40”x48” or 36”x48” pallets
• 800 Watt design
• Preserves temperature sensitive material
• Quick and easy assembly for portability and storage
• Great solution for palletized products: paint, caulk, resins and epoxies, etc.
• Two side access doors on opposite sides
• Certified to UL/CSA standards
• A durable, vinyl shell

POWERBLANKET HOTBOX
All the features of the Powerblanket Lite Hot Box, plus:
• Higher wattage (1200 Watts) for faster heating times & more extreme conditions

PREMIUM ROOFER HOTBOX
The Premium Hot Box provides all the features of the Powerblanket model but also offers:
• A larger footprint (Fits 48” x 48” pallet)
• An internal steel frame
• The highest wattage (1440 Watts)
Mitch Dickinson with Outsiders Roofing in Richfield Utah saves time and money with a Powerblanket Hot Box. Prior to owning a hot box, the company struggled when the winter temperatures got too cold in the mountain region of Utah. Roofing materials were hard to work with and their equipment would freeze up, causing installation issues and delays. Now, Mitch has his crew set up a hot box and keep it turned on throughout their job. “We use it quite a bit to prevent problems with cold weather and to have our materials warm when we are ready to use them,” says Mitch. They put everything from shingles and caulk to their compressor and nail guns in the hot box. Some of the crew have even snuck into the hot box to warm up or to warm up their gloves on particularly cold days.

*Heat circulation results can vary. For more precise temperature control a circulation fan is recommended.
