BUILD THE ROOF YOU NEED.

The key advantage of the JM SBS customizable system is your ability to pick and choose the different layers of the system you need to meet your specific job requirements and codes. To make results even more dependable, JM manufactures all of these SBS building blocks in house – we're your trusted, one source to build the roof the way you need it.

HOT ASPHALT

A waterproofing and adhesive solution that sets as soon as it cools. This proven application is the lowest cost adhesive, standard type IV. Polymer modified also available.

COLD-APPLIED

Combines all the waterproofing and adhesive benefits of hot asphalt, without needing the kettle. Easy to apply as a spray or with a squeegee.

HEAT-WELDED

Additional bottom thickness provided to adhere during application. Minimal equipment needed (built into membrane) and no additional adhesives required.

MECHANICALLY FASTENED

Installs in similar manner as common single ply. Flexible cap sheet for hot, cold or heat weld. Minimal equipment needed and no additional adhesives required.

SELF-ADHERED

Full SBS blend for strong inner ply bonds. Minimal equipment needed and no additional adhesives required. Provides lowest occupant impact.

	LOWER INSTALLED COST	WIDE TEMPERATURE RANGE	REDUCED OCCUPANT IMPACT	SOLVENT-FREE
