## EFFICIENCY

- Trailer mounted for easy transport from job to job
- Compact design allows for unit to fit in most residential driveways
- Convenient all-in-one control panel
- Allows crews to quickly tear-off existing roof
- Totally enclosed chute means nothing misses the dumpster
- Eliminates additional clean-up on job sites and prevents damage to landscaping

## FLEXIBILITY

- Folding lower chute adjusts to dumpster size and location
- Able to be positioned over a standard size dumpster or dump trailer
- Folding upper chute adjusts to roofline and provides large open hopper (4-feet wide)
- Adjustable outriggers provide leveling and safety on uneven terrain
- Can reach roof heights up to 30-feet
- Up to 20-feet of clearance between base unit and building

## DEPENDABILITY

- Non-stick, durable high-density poly chute is virtually self-cleaning
- Heavy-duty, corrosion resistant aluminum construction of primary parts
- Inside of chute lined with UHMW to absorb impacts from debris
- Powder-coated steel trailer and lift mechanism
- Batter operated hydraulic lift system with integrated charger
- Unique, one-of-a-kind design, U.S. patent number 9,555,968
