

Tedlar®

Mike's Organic Grocery in Connecticut

The owner of this new grocery store worked with Tedlar® partner Northeast Metal Supply to select their construction materials, especially the finish for their aluminum roof. They chose a matte black Tedlar® 1.500" snap lock roof due to its long warranty and lasting new appearance.

The owner will have peace of mind that their store – located off the side of a busy road and subject to changing seasons – will look clean, beautiful, and resist fade and corrosion for many decades.
