

## Strong, Versatile, Dependable

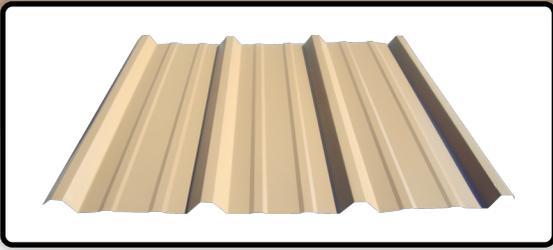

**r-panel**

Commercial steel roofing,  
to protect your structure

Also known as PBR-Panel, R-Panel is our most commonly used metal roof and siding panel for commercial applications. Its durable design and flexibility have made it the industry standard for many project types. The 1-1/4" tall ribs allow for greater distance between purlins and installation on slopes as low as 1:12.

# r-panel

## Strong, Versatile, Dependable

### Strong

R-Panel is designed to perform in commercial and industrial applications. From its strong 26 gauge standard thickness to its 1-1/4" oversized ribs, R-Panel is ready for the toughest roofing jobs out there.

### Versatile

Roofing? Siding? Commercial? Industrial? Agricultural? Whatever your roofing need, chances are that R-Panel is up to the challenge. R-Panel can be installed on slopes as low as 1:12, much lower than most other roofing systems.

### Dependable

R-Panel is easily one of the most tested metal roof systems in the world, having been installed on tens of thousands of steel buildings and other applications worldwide.

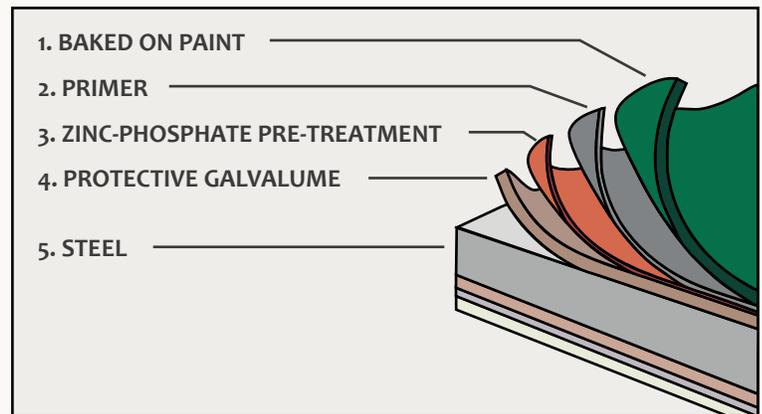

Whether you want to protect a large commercial building, or a simple shed, you can rest assured that your investment is secure with R-Panel

### Specifications:

- 40 Year Paint Warranty
- 26 and 24 Gauge Available
- 36" Coverage
- 1-1/4" Rib Height
- Fire, Hail, & Wind Resistant
- Energy Efficient
- Available in Over 14 Attractive Colors
- Energy Star Rated on All Colors
- Installs Over Solid Decking or Open Framing
- Minimum Slope: 1:12
- High Quality SMP Baked on Paint

### Advanced Protective Coatings

R-Panel is protected by baked on enamel paint: tough for installation, resistant to fading, and Energy Star® reflectivity to save on utility bills.

**Paint:** Durable baked on paint offers a permanent finish, easily lasting 40+ years. This ensures protection and beauty for years to come.

**Galvalume:** Under the paint, Galvalume (55% zinc, 45% aluminum) provides lasting corrosion protection, even if paint is scratched during installation.

**Steel:** A heart of high-tensile steel guarantees strength and endurance. With the highest ratings possible for wind, hail, and fire, R-Panel is ready to weather anything nature throws its way.
