

PRODUCT DESCRIPTION

Kool Seal® Bleed Blocker Primer (KS0034400) is a high performance waterborne epoxy for use with Tundra silicone coating. This product is used as a primer to create a smooth, fully adhered substrate prior to application of Tundra Silicone coating. Application of the primer helps to prevent bleed through over asphaltic substrates and improves long term performance and durability.

FEATURES AND BENEFITS

- Helps reduce bleed through
- Prepares surface for silicone coatings
- Promotes adhesion

RECOMMENDED USES

- All types of asphaltic surfaces

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in U.S.) or contact your local health authority.

Surface must be power washed (minimum 2,000 psi) to remove dirt and other foreign matter that could prevent proper adhesion. Surfaces must be completely dry prior to coating. **IMPORTANT: Where ponding water conditions persist beyond 48 hours, roof drains or other corrective measures must be installed to eliminate water buildup prior to coating the roof.** Repair all cracks, breaks, open seams and other imperfections prior to application

APPLICATION

Do not apply below 55° or above 110 F or when rain is forecast. Applications during periods of low temperature or high humidity will extend dry time. **DO NOT THIN. KEEP FROM FREEZING.**

Thoroughly mix product prior to application. Airless spray or apply with a low-nap roller or broom at appropriate coverage rate. For specific application guidelines, call 888-321-KOOL (5665).

CLEANUP

Warm, soapy water
