

# Extreme Moisture Protection Waterproofing Membrane

## **NX SEAL®**

SELF-ADHERING WATERPROOFING MEMBRANE

### Above or Below Grade Waterproofing System

**NX Seal®** is a prefabricated, self-adhering waterproofing membrane composed of a high-tensile polyester film coated with an asphalt adhesive system. NX Seal® is suitable for use in both vertical and horizontal applications.

This economical system aggressively bonds to the substrate and seals around fasteners to prevent damage caused by water penetration. Material is available in a variety of width options to conform to the job requirements.

- Aggressively adheres to the surface
- Broad application temperature range
- Self-sealing around building fasteners
- Easy to handle and install
- Outer film compatible with most sealants
- Uniform thickness for dependable protection
- Competitively priced
- Made in the USA
