

DUAL DEFENSE: FIRE RATED. WATER TIGHT.

**SECURE ROOF
COMPONENTS™**
by Eagle Roofing Products

EAGLE ANCHOR XFR™
BY **POLYGLASS™**

Eagle Anchor XFR by Polyglass® is an exceptional underlayment engineered for defense against both fire and water intrusion. Featuring a durable plastomeric top layer, a self-sealing SBS modified bottom layer, and patented Burn-Shield Technology® that passes industry standard fire testing, Eagle Anchor XFR delivers superior protection for fire hazard severity zones.

Ideal for use beneath clay and concrete tile roof systems, Eagle Anchor XFR is a cost-effective option providing Class A Assembly fire protection and water resistance in a single layer—eliminating the need for multiple products to meet WUI codes or additional performance requirements.

Features & Benefits

- Patented Burn-Shield Technology® by Polyglass® provides superior ember resistance
- Meets California Building Code requirements—Class A Fire Rated underlayment for WUI (Wildland Urban Interface)
- Class A Assembly under multiple steep-slope roofing products*
- Fiberglass mat provides increased strength and ability to withstand incredibly high temperatures
- Mineral aggregate surface engineered for superior anti-slip surface
- Water-resistant modified asphalt compound
- 2 square roll size
- Up to 180-day exposure
- Standard 10-Year Limited Material Warranty by Polyglass® or a 10-year Labor & Material Warranty when installed by a Polyglass Registered Contractor

Choose Eagle Anchor XFR for powerful, single-layer protection you can trust.
