

SPECIFY WITH CONFIDENCE

Built for Performance. Backed by Experience.

Choosing IB Roof System's TPO means choosing:

- Flexible membrane featuring a wide weld window
- Fast installation and ease of maintenance
- Energy efficiency at a cost-effective price point
- Smooth-back and fleece-back options in multiple thicknesses
- High puncture resistance with code approvals for Very Severe Hail (VSH)
- Full line of compatible accessories
- Made in USA manufacturing
- Decades of commercial roofing expertise
- Excellence in customer service

IB TPO is ideal for large, open roof spaces including warehouses, distribution centers, retail centers and big box facilities. Designed with contractors in mind, it delivers installation efficiency without compromising long-term durability.

COMPLETE COMMERCIAL ROOFING SOLUTIONS

IB TPO roofing systems integrate seamlessly into IB's broader commercial roofing platform, combining membrane technology, reflective performance and contractor support you can depend on. We deliver a full portfolio of high-performance roofing technologies engineered for durability and system compatibility, including PVC, TPO, liquid-applied roofing systems, insulation and coverboards and coordinated accessories and components. IB products offer the solutions needed to protect your commercial and residential assets.

Complete TPO Roofing Solutions

 Performance

 Durability

 Integrated System Confidence

Commercial Roofing Solutions
Featuring up to 25 Year Total System Commercial Warranties

IB Roof Systems delivers roofing technologies engineered to perform over decades. As part of IB's comprehensive roofing product portfolio, which includes industry-leading PVC and liquid-applied systems, IB TPO roofing solutions provide reliable weldability, flexibility and energy-efficient reflectivity within a complete, integrated system.

IB TPO is ideal for large, open roof spaces including warehouses, distribution centers, retail centers and big box facilities. Designed with contractors in mind, it delivers installation efficiency without compromising long-term durability.

Manufactured to meet and exceed ASTM D 6878-21 requirements for thermoplastic polyolefin membranes, IB TPO is engineered for demanding field conditions. Reinforced fabric construction combined with advanced membrane formulation ensures consistent weld strength, predictable handling and long-term durability. Crews benefit from improved productivity while maintaining high-quality installation standards.

PERFORMANCE HIGHLIGHTS

- Meets and exceeds ASTM D 6878

- Wide welding window allows flexibility during installation

- Excellent reflectivity reduces heat absorption and supports energy efficiency

- CRRC rated and compliant with California Title 24 solar reflectance and emissivity requirements, supports LEED SRI standards (White, Tan)

- Manufactured in the USA

FULL SYSTEM COMPONENTS

IB Roof Systems offers a complete TPO roofing system engineered for compatibility and performance, including:

- Insulation and polyiso options
- Coverboards
- Vapor barriers
- Heat-weldable accessories and detailing components

BACKED BY IB WARRANTY AND SUPPORT

Every IB roofing system is supported by robust warranty programs and comprehensive technical resources.

- Up to 25-year Residential and Commercial Warranties available
- Long-term warranty options aligned with system selection
- Dedicated technical support from experienced professionals
- Installation guidance and detailed specification libraries
- Code compliance documentation and project assistance
