

WIN NATIONAL ACCOUNTS. GROW YOUR BUSINESS WITH TERIAL + PEGNATO

What is the Terial + PRIN Integration?

Pegnato Roof Intelligence Network (PRIN) is a nationwide ecosystem that connects large national brands to the best local roofing contractors. PRIN manages a portfolio of more than 15,000 roof assets valued at \$3 billion across the retail, shopping center, and restaurant chain sectors. PRIN generates qualified opportunities for local contractors and project manages all services directly with national owners and facility managers.

Through this integration, PRIN work orders flow directly into your Terial platform. When a national account needs service at a location in your market, the job lands in your Terial dashboard automatically. No manual entry, no extra logins, no friction.

Why It Matters

-  **Access national accounts without cold calling.** PRIN connects you to some of the largest companies in the country. Jobs come to you based on your service area and capabilities.
 -  **Work orders land directly in Terial.** No switching between platforms. PRIN jobs appear alongside your existing service and project work in one connected system.
 -  **Grow revenue with premium commercial clients.** Build lasting relationships with national brands that need ongoing roof maintenance, inspections, and repairs across their portfolios.
 -  **No cost to join.** There is no fee to join the PRIN network or use this integration. It is a free benefit included with your Terial partnership.
-

How It Works

-  Apply to join the PRIN contractor network of leading roofing contractors and connect your Terial account.
-  Large national brands use PRIN to connect with top local roofing contractors. Receive dispatch requests from a curated network of large national brands.
-  Upon approval, work orders flow directly into your Terial platform with real-time updates and automations through the Terial / PRIN API.
