

RESIDENTIAL COLOR INSPIRATION

A Simple Way to Choose Exterior Color Schemes With Confidence

Choosing exterior colors is a big decision — seeing how every element works together can make all the difference.

Sherwin-Williams color schemes are designed to help homeowners visualize complete exterior combinations, including roof, siding, trim and accent colors. Each palette features professionally curated combinations built around today's most popular metal roofing colors.

These collections are intended to be used alongside your contractor, making it easier to talk through options, narrow down choices and align on a look that fits your vision.

How to Use These Color Schemes:

- Explore different color combinations and identify what stands out
- Compare palettes to see what works best for your home style
- Discuss options with your contractor to refine your selection
- Decide with the confidence of knowing your colors are designed to work together

By using these palettes during your conversation, you and your contractor can move through the selection process more efficiently and with greater clarity.

Color can **DO ANYTHING.**
