

CODE-COMPLIANT RIDGE VENT PROTECTION

**Roofer-ready wildfire defense
for continuous ridge vents.**

RidgeArmor™ is a pre-formed 304 stainless steel woven mesh panel designed to help protect continuous ridge vent openings from wind-driven ember intrusion while maintaining attic ventilation. Built for wildfire-prone markets, RidgeArmor gives roofers a simple, code-aligned way to harden one of the roof's most vulnerable openings.

RidgeArmor installs beneath continuous ridge vent products and above the attic opening.

WHY ROOFERS LIKE IT

- ✓ Addresses protected vent opening requirements
- ✓ Installs beneath common continuous ridge vent products
- ✓ Compatible with reroofs and new construction
- ✓ Helps reduce ember intrusion risk
- ✓ Supports wildfire-resilient roof assemblies
- ✓ Fast and easy installation
- ✓ Durable 304 stainless steel construction

KEY PRODUCT SPECS

- 304 stainless steel
- 1/8" opening
- .028" wire diameter
- Approx. 2700°F melting point
- Noncombustible and corrosion resistant
- Designed specifically for continuous ridge vents

MANY COLORADO JURISDICTIONS NOW REQUIRE PROTECTED VENT OPENINGS.

Roofers who understand the new CWRC requirements will have a significant advantage when bidding projects in wildfire-prone areas.

COLORADO CODE ALIGNMENT

RidgeArmor™ is designed to support protected vent opening requirements found in the 2025 Colorado Wildfire Resiliency Code (CWRC).

- CWRC Section 403.4 – Ventilation Opening Requirements
- Wildland-Urban Interface (WUI) Construction Provisions
- Ember-Resistant Building Design Requirements

Final approval is subject to local jurisdiction and the Authority Having Jurisdiction (AHJ).

A PRACTICAL SOLUTION FOR CWRC COMPLIANCE

RidgeArmor provides a simple, reliable way to meet the intent of CWRC protected vent opening requirements while maintaining the performance of continuous ridge ventilation.

- ✓ Helps protect homes from wind-driven ember intrusion
- ✓ Designed for real-world roofing applications
- ✓ Maintains attic ventilation and energy performance
- ✓ Supports long-term durability and building resilience
